ALEJANDRO APARCEDO

aaparcedo.io@gmail.com | linkedin.com/in/alejandro-aparcedo | alejandroaparcedo.com | 786-357-3990

EDUCATION

University of Central Florida
Computer Vision, M.S., GPA: 3.9 / 4.0 — *Aug 2025 - December 2026*
Computer Science, B.S., GPA: 3.5 / 4.0 — *May 2020 - December 2024*
Awards: NSF GRFP Fellow ($159K)

EXPERIENCE

Software Engineer — *Starting February 2027*
Bloomberg, New York

- Joining full time after the internship.

Software Engineer Intern — *June 2026 - August 2026*
Bloomberg, New York

AI Engineer — *March 2026 - May 2026*
oncologic.ai

- Developed computer use agents for data extraction from legacy systems using **Claude Sonnet** and **Vertex AI**.

AI Research Intern — *September 2025 - Present*
Center for Research in Computer Vision

- Lead author of CVPR Workshops paper where I explored video understanding with Multimodal LLMs.
- Developed a novel benchmark in **PyTorch** to evaluate spatio-temporal grounding capabilities in video MLLMs.
- Created data pipeline with **Pandas** and **OpenCV** to clean, process, and analyze **200k+** video samples.

Supercomputing Intern — *May 2025 - August 2025*
Los Alamos National Laboratory

- Built a 10 node supercomputer using **Ansible** for configuration management and **iPXE** for netbooting.
- Benchmarked GPUDirect Storage on NVIDIA GPUs for AI/ML workloads over **NVMeOF** on **InfiniBand**.
- Benchmarked network bandwidth and latency of **InfiniBand** and **Ethernet** using **iPerf3** and **Perftest**.

AI Research Intern — *November 2023 - November 2024*
Florida Solar Energy Center

- Lead author of CVPR workshop paper where I applied computer vision for power outage prediction.
- Developed **PyTorch** framework for hurricane power outage forecasting using nighttime satellite imagery.
- Accelerated processing of geospatial data by **98%** through algorithm and **multi-GPU** optimization.
- Created **exploratory data analysis** framework for **500GB** of satellite imagery using **Pandas** and **NumPy**.

AI Research Intern — *May - November 2023*
Center for Research in Computer Vision

- Coauthor of CVPR paper where I explored visual vulnerabilities of Multimodal Large Language Models.
- Developed **PyTorch** framework for evaluating visual attacks on Multimodal Large Language Models.
- Analyzed visual robustness of LMMs for **image classification** and **caption retrieval** tasks.

SKILLS

Tools: Claude Code, Antigravity, Cursor, OpenClaw, Hermes Agent
Programming Languages: Python, C/C++, SQL, Bash, JavaScript, HTML, CSS
Technologies: PyTorch, HuggingFace, NumPy, Pandas, React, Git, Streamlit, LaTeX, OpenCV, RAG
Backend & Cloud: FastAPI, AWS, Cloudflare
Infrastructure: Docker, Linux, Nginx, CI / CD, Slurm, Parallel computation, Distributed Systems
Languages: English, Spanish
